Profile

Passionate Computer Science graduate specializing in front-end development and UI design. Experienced in building real-world projects with clean, responsive, and user-friendly interfaces. Eager to join a forward-thinking company where I can contribute my skills, learn from experienced professionals, and continue to grow as a developer in a collaborative environment.

Projects

Autine, *Front-End* 🔗
A multilingual AI chatbot supporting individuals with Autism.
- Enables personalized, emotionally intelligent conversations
- Built the full front-end interface from scratch
- **Grade: A+**

Homify, *Front-End* 🔗
- Responsive landing page designed using Bootstrap, created for an innovative interior design platform concept.

The Journey, *Front-End* 🔗
- Developed a dynamic website enabling users to conveniently book flights online.
- Integrated social media-like features for sharing travel experiences and content creation, enhancing user engagement.

Delicacies, *Figma UI Design* 🔗
- Designed the user interface for a recipe-sharing website, focusing on user experience and aesthetic appeal.
